

It has come to my attention that the National Association of Broadcasters has filed petition 04-160 in an attempt to stifle competition. I am a paying customer of XM Radio and benefit from the variety and quality of the programing. The new XM Instant Traffic & Weather content is usefull and would like to see it expanded. It is my opinion that the NAB has over stepped its bounds in regards to petition 04-160. Please let the market determine what has value and reject petition 04-160.

Thank you,
